

## Energiekonzepte Deutschland: Moving business to the cloud for a brighter future with SAP S/4HANA Cloud Public Edition

### Before: Challenges and opportunities

- Remain a leader in the increasingly crowded and competitive solar energy market.
- Take the next step in the digitalization journey by embracing cloud technologies.
- Modernize the company's legacy ERP system, which was no longer fit for purpose.

### Why SAP and UNIORG

- Next-generation ERP with SAP S/4HANA Cloud Public Edition for future-ready business operations.
- Ability to select data center location, storing data in Germany to meet regulatory requirements.
- Pre-defined industry-standard best practices, helping to shorten time to value.
- Expert support from UNIORG, with proven experience of similar cloud ERP deployments.

### After: Value-driven results

- Enhanced operational efficiency by integrating all business processes in SAP S/4HANA.
- Enabled EKD to scale the business much more easily and cost-efficiently.
- Empowered users to derive revenues and costs in a matter of seconds.
- Made it easier for external auditors and data protection officers to understand EKD's processes.
- Improved transparency, supporting strategic decision-making, including reaction to political changes.
- Freed up resources to focus on customer needs; EKD's highest priority is customer satisfaction.

“For me, SAP S/4HANA Cloud Public Edition means standardized and consistent processes, which makes SAP unique.”

Tom Krüger, Head of CRM/ERP, Energiekonzepte Deutschland GmbH
